SUMMARY

Computer Engineering undergraduate (B.Tech, 2028) with strong Computer Science fundamentals, a 9.00 CGPA and 200+ LeetCode problems solved. Experienced in end-to-end solution development for web and business applications using Java, JavaScript, Python, the MERN stack and SQL, covering technical design, RESTful API development, testing, documentation, deployment and troubleshooting. Clear communicator who enjoys translating business requirements into scalable internal tools and information systems. Seeking Application Engineering internship roles.

EDUCATION

Thapar Institute of Engineering and Technology, India
Bachelor of Technology (B.Tech.), Computer Engineering

Aug 2024 – May 2028
CGPA: 9.00

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Computer Networks, Software Engineering

PROJECTS

LabTrack — Internal Lab Asset & Request Management Portal

React, Node.js, Express.js, MySQL, JWT

- Gathered business requirements from lab staff and wrote a technical design document for an internal business application that tracks lab equipment, issue and return requests and approvals, replacing a manual spreadsheet process.
- Designed a normalized MySQL schema (assets, users, requests, audit logs) with foreign keys and indexes, and wrote SQL queries with joins and aggregations for low-stock and overdue-return reports.
- Developed RESTful APIs with JWT authentication and role-based access control for admin, lab staff and student roles, including input validation and centralized error handling.
- Integrated third-party and enterprise software services (Google Sheets API for report export, Nodemailer email alerts), added Jest unit tests with API documentation in Postman, and deployed on Render with CI/CD via GitHub Actions.

SpendSense — Personal Finance Anomaly Detection

React, Node.js, Express.js, MongoDB, JWT

- Built a full-stack MERN expense tracker with a transparent rule-based anomaly detection system.
- Designed an anomaly scoring model using three weighted signals: spending deviation, category rarity, and transaction timing.
- Implemented JWT authentication, RESTful APIs and a React dashboard with Recharts for spending visualization.
- Created realistic demo data of approximately 120 transactions and 6 planted anomalies, and added unit tests covering edge cases to validate scoring behavior end-to-end.

PulseDesk — Customer Feedback Sentiment Dashboard

React, Node.js, Express.js, MongoDB, Scikit-learn

- Developing a customer feedback classification system using TF-IDF and Logistic Regression to classify sentiment and urgency.
- Building a MongoDB data ingestion pipeline and administrative dashboard to monitor customer sentiment trends over time.
- Implementing automated tagging of urgent complaints using negative sentiment and keyword-based signals to support faster customer support triage.

TECHNICAL SKILLS

Programming Languages: C++, Java, Python, JavaScript (ES6+), SQL

Web Development: React.js, Node.js, Express.js, RESTful APIs, Web Services, API Development, JWT Authentication, Role-Based Access Control, Third-Party Integration

Databases: MySQL, MongoDB, Mongoose, Schema Design

Data Science & Machine Learning: Pandas, NumPy, Scikit-learn, Logistic Regression, TF-IDF, Matplotlib, Seaborn

Developer Tools & Practices: Git, GitHub, GitHub Actions (CI/CD), Postman, VS Code, Jupyter Notebook, Jest, Unit Testing, Debugging, Technical Design, Documentation, Agile

Computer Science Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks, Problem Solving

PROFESSIONAL EXPERIENCE

Student Alumni Interaction Cell — Coordinator

Sep 2024 – Mar 2025

- Coordinated communication between student and alumni stakeholder groups to plan and execute engagement events.
- Served as the primary point of contact between alumni and students, ensuring timely follow-up and coordination.

Microsoft Student Learn Chapter — Web Team Member

Sep 2024 – Mar 2025

- Developed the About Us and Timeline pages for Makethon-7 as part of a cross-functional web development team.
- Collaborated with designers and event organizers to deliver responsive and user-friendly web experiences.

ACHIEVEMENTS

- Solved 200+ Data Structures & Algorithms problems on LeetCode with a 1540 contest rating; scored in the 97th percentile in JEE Mains 2024.
